Security Support Services: Consulting & Project Management

Security Support Services offers government clients comprehensive management consulting program that supports security analysis, procurement and project management of facilities and special environments. Contracted services include:

Develop and analyze vulnerability assessment reports

Generate statements of work for recommended security countermeasures

Create independent government cost estimates

Conduct pre-bid walk through with contractors

Provide contractor negotiation support Communication liaison between Contract Officer's Technical Representative (COTR) & Project Managers

Generate project commissioning documents

Support project kick off and progress meetings

Facilitate random on-site audits & provide status reports while maintaining project timelines

Corporate Overview

What began in the late 1980's as a small burglar alarm company evolved as did commercial and government client's demand for video surveillance and alternative security solutions, thereby shifting the company's focus to what is now Securityhunter Inc.; a company committed to securing commercial and government clients by offering technologically advanced security solutions and consulting services with integrity.

Securityhunter's electronic security system expertise coupled with our knowledge of a variety of complex environments to include: U.S. Department of Defense, transportation hubs: rail and port, retail shopping arenas, hospitals, and state & local government facilities, provide an added value in today's marketplace. Capable of a breadth of environments specializing in a depth of electronic security solutions. Our team of technical experts are versed with a variety of systems that may be incorporated in a multitude of environments

Government agencies and Fortune 500 companies receive a level of safety and security from the targeted security solutions that Securityhunter provides. From a multitude of security systems to highly specialized VIP defense capabilities, Securityhunter has achieved significant growth with a prestigious list of clients spanning numerous industries and levels of government.

Post September 11, 2001, the U.S. Federal Government has sought out subject matter experts for support with recently funded U.S. Homeland Security initiatives related to electronic security countermeasures. As a Government & GSA Contractor Securityhunter has and will continue to provide program management services, Security Support Services and Security Integration Services to support the United States government.

Retail security dynamics continue to dramatically change with an increased consumer safety focus. Retail environments, whether box store, strip centers or malls seek qualified experts to implement new public safety mandates to include video surveillance and emergency communications systems. Securityhunter's video surveillance and emergency communication systems improve and often enhance established security initiatives to include guard services & physical security providing a more comprehensive security system.

In addition to providing a comprehensive understanding of current security industry countermeasure requirements, our success in the industry may be attributed to structuring company resources to meet the security needs of our clients. This requires an infrastructure capable of delivering goods and services within the allocated time schedule, and within the client's budget. Company resources are available 24 hours a day, 7 days a week. All installation & service work is managed with in-house certified security technicians (electricians, electrical technicians, fiber specialists, locksmiths...) ensuring clients experience optimal performance.

Regardless of size, every client receives an extremely high level of responsiveness, technical capability and resolution of equipment and system issues.

We value each client with a personal approach because we believe people build our business. Employees are client focused, driven to build long term relationships. We truly believe customer satisfaction is as important as the safety, security and reliability of our systems

“Securing Commercial and Government Clients since 1988”

Government Projects

Keesler Air Force Base

Installing Intrusion Detection Systems (IDS) on eight (8) Dormitories.

Bolling Air Force Base

Integrating a video surveillance and access control system for anti-terrorism force protection utilizing encrypted communications technology. Video system utilizes latest high resolution auto-focus auto-zoom technology.

United States Department of Agriculture-ARS

Providing Management Support Services including site assessment, security design, and project management for 135 site agency.

Commercial Projects

GGP, Tysons Galleria in Mclean VA Securityhunter installed nearly 50 high resolution color cameras, mostly pan, tilt, and zoom (PTZ) units, a digital recording network, a fiber optic network infrastructure and an extensive integrated emergency phone system throughout the 900,000 sq. ft. shopping facility.

The Mall at Union Station, Washington, D.C. Securityhunter upgraded Union Station's existing fixed camera video system to include PTZ cameras. The technology was installed with 100% fiber optic transmitters. The upgrade also included the installation new digital monitors and digital recording equipment enabling security personnel to watch and track activity from a new central security command center.

University of the District of Columbia (UDC) Upgraded a legacy video surveillance system by adding Pelco PTZ cameras campus wide utilizing their existing UTP wire infrastructure that greatly reduced the cost to the client.

IKEA, White Marsh MD Incorporated a new video matrix and digital video recording platform to include the installation of 90 new fixed and PTZ Pelco cameras. Secured the retailers critical facility areas with the installation of a new Keyscan access control system.
