

Securityhunter, Inc. Hosts Its First Annual Black Tie Casino Royale

Baltimore, MD November 20, 2015

Securityhunter, Inc., located in Baltimore, Maryland, hosts an evening of fun, food, and festivities

It was the Securityhunter, Inc. Headquarters, but for the evening of Saturday, November 14, 2015, 7249 Ambassador Road was transformed into the Securityhunter Casino Royale as we celebrated Vegas Style. To help with the event, Metro Casino Events, LLC was called in to provide the games and the dealers. Donned in our tuxedos and gowns, Securityhunter staff and invited guests played pool, poker, roulette, blackjack, craps, and baccarat.

“This event was amazing and everyone had a great time. What a unique way to celebrate our success.” says Dana Ashton, Executive Administrative Assistant and the planner of the event. “We started planning Casino Night back in August. Initially, we were very calm and the Securityhunter Team was talking about it and the closer we got to the date, the more excited everyone became. In fact, finding the perfect gown and renting tuxedos became the office chatter.” Players were provided \$1,000.00 of fun bucks and cashed them in for chips at the various tables. At the end of the night, those chips were exchanged for raffle tickets and a chance to take home one of three cash prizes.

“After years of watching 007 James Bond, we finally learned how to play baccarat!” says CEO, Michael S. Rogers

Guests were given take home gifts of lottery scratch-offs and a picture commemorating the event. Door prizes were provided by Bosch, ScanSource, Razberri, and Milestone. The food was catered by Josephine Gupton and photography provided by Monay Ashton.

About Securityhunter, Inc.:

Founded in 1988, Securityhunter targets security solutions which support a wide range of government security initiatives. Securityhunter manufactures, designs, installs and maintains electronic and information security countermeasure systems for government facilities. Securityhunter offers professional security support services, and assists U.S. federal, state and local agencies with assessments and management of security tasks for mission critical CONUS and OCONUS operations.
