

Securityhunter, Inc. Among Select Awarded Prime Contract for SeaPort Next Generation

Baltimore, MD December 2018

Securityhunter, Inc., located in Baltimore, Maryland, selected as one of the Prime Contractors for SeaPort NxG

The Navy awarded 1,870 indefinite-delivery/indefinite-quantity, multiple-award contracts (MACs) to businesses in multiple locations across 46 of the 50 United States, the District of Columbia, and Guam for future competition of support service requirements to be solicited by Department of the Navy activities under the SeaPort Next Generation (SeaPort-NxG) multiple-award contract vehicle.

All work under the contracts will fall under two categories (engineering support services and program management support services), which are further divided into 23 functional areas.

Contracts Manager, Xanne Luera shared, “The new SeaPort-NxG IDIQ contract offers Securityhunter the potential to reach new customers in the Federal Government market we serve. Securityhunter looks forward to leveraging our broad technical electronic security subject matter expertise for the Navy.”

When asked about the significance of this award, Founder and CEO, Michael S. Rogers stated, “The U.S. Navy has been an important client of ours as we have provided over \$50,000,000.00 in systems and support over the past five years. Now, we can continue our growth with this vital government client”.

The government estimates approximately \$5,000,000,000 of services will be procured per year via orders issued under the SeaPort-NxG multiple award contracts. Under these multiple-award contracts, each contractor will be provided a fair opportunity to nationally compete for individual task orders. The MACs have a five-year base period of performance with an additional five-year ordering period option.

About Securityhunter, Inc.:

Founded in 1988, Securityhunter targets security solutions which support a wide range of government security initiatives. Securityhunter manufactures, designs, installs and maintains electronic and information security countermeasure systems for government facilities. Securityhunter offers professional security support services, and assists U.S. federal, state and local agencies with assessments and management of security tasks for mission critical CONUS and OCONUS operations.
