Securityhunter, Inc. Re-certifies its TMA Installation Quality (IQ) Certification

April 12, 2022, Baltimore, MD – **Securityhunter, Inc.** has successfully met the requirements to renew its "Installation Quality (IQ)" certification. The only quality control program for electronic security system installation, monitoring, maintenance, and service, The Monitoring Association's (TMA) IQ certification demonstrates a provider's pledge to adhere to a stringent code of ethics and to provide the highest quality maintenance and service.

Being IQ-certified formally recognizes a company's dedication to saving lives and to reducing false alarms. All certified companies must train their employees in industry-recognized programs; meet all licensing requirements; and, carry proper insurance coverage. Most importantly, companies must recertify annually by satisfying all of the designation's requirements and by receiving the approval of a dedicated review committee.

For more information about Securityhunter, Inc., go to www.securityhunter.com. To learn more about TMA or its IQ certification program, go to www.tma.us.

About Securityhunter, Inc.:

Founded in 1988, Securityhunter targets security solutions which support a wide range of government security initiatives. Securityhunter manufactures, designs, installs and maintains electronic and information security countermeasure systems for government facilities. Securityhunter offers professional security support services, and assists U.S. federal, state and local agencies with assessments and management of security tasks for mission critical CONUS and OCONUS operations. Securityhunter also holds the distinction of being a GSA Multiple Award Schedule Contractor since 2001.

About IQ Certification

To be IQ Certified, companies pledge to adhere to a stringent code of ethics and to provide top-notch maintenance and service. Employees must be trained in industry-recognized programs, meet all licensing requirements, and carry proper insurance coverage. Most importantly, companies must demonstrate that they are meeting these requirements annually in order to be re-certified. As the only quality control program for installations, maintenance and service of electronic safety systems, IQ Certification serves as a badge of honor for companies that have met the program's criteria to earn certification. IQ Certified companies are able to develop positive relationships, a positive revenue stream and positive customer feedback – the three main ingredients for running a successful business.
