

Dedrone Technology Available on GSA Schedule 84

Leading global counter-sUAS company partners with government security solution provider Securityhunter Inc., to provide government agencies with tools to protect against drone threats

SAN FRANCISCO and BALTIMORE, December XX, 2019 – Dedrone, a leading global provider of counter-sUAS solutions, today announced a partnership with Securityhunter, Inc., which will provide U.S. federal, state and local government agencies rapid access to Dedrone technology through the U.S. General Services Administration (GSA) Federal Supply Schedule. All U.S. government agencies who purchase through GSA can now streamline their acquisition and deployment of the world’s leading counter-sUAS platform.

Dedrone and Securityhunter provide essential tools for government agencies to assess their airspace activity, protect assets, and eliminate unauthorized sUAS-based threats. The Dedrone counter-drone technology platform includes a combination of [DroneTracker software](#) and [hardware](#) which detects, classifies, and [mitigates](#) sUAS threats.

“Small drones are an active and escalating threat to the safety and operations of U.S government missions, including military installations, critical infrastructure, correctional facilities and deployed assets,” shares Phil Pitsky, Vice President of U.S. Federal Operations at Dedrone. “Together with Securityhunter, Dedrone provides rapid access and opportunity for all U.S. federal, state and local government agencies to get ahead of the drone threat, prevent disruption caused by nuisance or malicious drones, and build resilience in our nation’s most sensitive airspace.”

For over 30 years, Securityhunter has successfully served commercial and government markets with technologically advanced security solutions. Products offered incorporate a multi-level security infrastructure, which include both custom and Commercial Off-The-Shelf (COTS) designed and engineered physical security solutions. Our federal GSA contract vehicle offers clients force protection security products and services that support security requirements for federal, state and local government agencies, products and services are available via GSA Schedule 84 Security, Fire, & Law Enforcement Contract # [GS-07F-0029M](#).

“Dedrone is a tested and proven technology leader in addressing the asymmetric drone threat both in the U.S. and abroad,” shares Ross Nelson, Executive Director of Securityhunter Inc. “When assessing counter-sUAS programs to integrate into our technology offerings, our team found that DroneTracker provides a great value to meet our customer’s perimeter situational awareness requirements. We look forward to growing Securityhunter’s expertise in airspace security protection and supporting U.S. federal agencies in deploying Dedrone technology at their facilities.”

In addition to equipping U.S. [federal agencies](#) and [military installations](#), Dedrone’s solution is deployed to customers around the world, including correctional facilities, such as the [Kentucky Department of Corrections](#), utilities, [airports](#), and corporations, among other public and private organizations.

About Dedrone

[Dedrone](#) is the market and technology leader in airspace security. The Dedrone counter-drone platform combines hardware sensors and machine-learning software, providing early warning, classification of, and mitigation against drone threats. Based in San Francisco, Dedrone was founded in 2014 and is backed by investors including Felicis Ventures, Menlo Ventures, and John Chambers, Chairman Emeritus of Cisco Systems and founder of JC2 Ventures.

About Securityhunter, Inc.

Founded in 1988, Securityhunter targets security solutions for its clients which support a wide range of government security requirements and initiatives. Securityhunter manufactures, designs, installs and maintains electronic and information security countermeasure systems for U.S. federal, state and local government facilities. Securityhunter offers professional security support services, and assists with assessments and management of security tasks for mission critical CONUS and OCONUS operations.
